

Errata for AES Convention paper 9220: “MPEG-D Spatial Audio Object Coding for Dialogue Enhancement (SAOC-DE)”

Jouni Paulus², Jürgen Herre², Adrian Murtaza¹, Teon Terentiv¹, Harald Fuchs¹, Sascha Disch², and Falko Ridderbusch¹

¹Fraunhofer Institute for Integrated Circuits, Erlangen, Germany

²International Audio Laboratories Erlangen, Erlangen, Germany. A joint institution of Universität Erlangen-Nürnberg and Fraunhofer IIS

1 Errata

This document provides the errata for the AES Convention paper [1].

1.1 Table 2

The correct form of Table 2 can be seen below.

SAOC-DE profile level	1	2
LD-QMF bank	-	-
Hybrid QMF bank	+	+
Max. number of residual channels	0	3
Max. sampling rate (kHz)	48	48
Max. number of objects	6	6
Max. number of dmx channels	3	3
Min. number of required outputs	1	1

Table 2: An overview of the levels of SAOC-DE profile.
